

YDN 50-D / F Nonwoven bag machine

We are engaged in making ultrasonic practical machine for 15 years.

We make nonwoven bag making machines, ultrasonic lace sewing machines, ultrasonic cutting machines, ultrasonic quilting/laminating machine and ultrasonic welding machines.

For making nonwoven bags, there are 2 kinds of single operating machines.

A. YDN-50-F ultrasonic press machine

YDN-50-F press machine is used to make the mouth of the bag.

Also it can be used to make the sleeve handles continuously.

B. YDN-50-D press machine. This machine is used to weld the sleeve handles onto the mouth of the bags.
