

Dear Sir,

I would like to take this opportunity to introduce our company and product.

Dimensi Timal quarry is the largest dimensional stone quarry in **Malaysia** with an estimated reserved of 600 million cubic meters or 1.5 billion metric tones, thus ensuring continuous supply.

We use the latest state of the art equipment to produce the quarry blocks more efficiently, more reliably and ensure more timely delivery of quality granite.

Our granite named "**JELI BLUNERO**" is an excellent export-quality grade granite, homogenous and it is reasonably price. The granite has a characteristic of coarse-grained texture with bluish-black tonality. It does not have any defects such as black spots or veins except for very rare occurrence of black patch.

We are currently promoting our product and selling at very reasonable price. Our first choice blocks are now selling at **USD 390/cu.m.**

Our big random slabs are also going cheap at **USD35/sq.m - USD50/sq.m**

All price are base on FOB Port Klang, Malaysia.

If you need more information, please email me or visit our website at <http://www.metacorp.com.my/quarrying>

I will be glad to answer to all your enquiries.

Regards,

Nik Faizul  
Vice President  
Dimensi Timal Sdn Bhd
