

Dr. Priti K. Shukla

M.S. (surgery), M.Ch. (plastic surgery)
F.C.S (cosmetic surgery) U.S.A.
Consultant Plastic and Cosmetic surgeon

Major Surgical Workup

Following tests are required before any major surgery under local or general anaesthesia, to assess the fitness for surgery and anaesthesia.

- Complete blood picture with platelets and PCV
- Random blood sugar
- Blood urea
- Serum Creatinine
- Bleeding time/ Clotting time
- Viral screening(HIV/ HbsAg)
- For Diabetics: Fasting blood sugar and post prandial blood sugar, corresponding urine sugar
- ECG and chest X ray (for people over 40 years and for hypertensive or diabetics)

Note:

1. If you are healthy and have had these tests done in last 3 months the reports will be valid.
2. Depending on individual and procedure, extra tests may be required.
