

**Dr. Priti K. Shukla**

M.S. (surgery), M.Ch. (plastic surgery)  
F.C.S (cosmetic surgery) U.S.A.  
Consultant Plastic and Cosmetic surgeon

## **Major Surgical Workup**

Following tests are required before any major surgery under local or general anaesthesia, to assess the fitness for surgery and anaesthesia.

- Complete blood picture with platelets and PCV
- Random blood sugar
- Blood urea
- Serum Creatinine
- Bleeding time/ Clotting time
- Viral screening( HIV/ HbsAg)
- For Diabetics: Fasting blood sugar and post prandial blood sugar, corresponding urine sugar
- ECG and chest X ray (for people over 40 years and for hypertensive or diabetics)

### **Note:**

1. If you are healthy and have had these tests done in last 3 months the reports will be valid.
2. Depending on individual and procedure, extra tests may be required.
