

Voldatech is an established and highly evolved provider in the telecom industry, located in Jiangsu province, China. Founded in 2005, we specialize in providing various wireless site mounting accessories, designing new products based on customers' unique needs and sourcing different products to help our customers explore and grab larger slices of communications markets.

We are now able to provide a wide variety of telecom products: Coax Mounting Accessories, Boot Assemblies, Entry Panels, Grounding Kits, Ground Bars, Cable Support Grips, RF Connectors, Jumper Cables, etc.

With the concept of meeting the needs of our customers, providing the best products available on the market and delivering our products with the fastest turnaround time possible, we have developed very fast and won long-term customers from North America , South America, Middle East and Asia.

From the view of development, we are putting more emphasis on product quality control, delivery service and after-sell service. We aim to make sure that every customer gets what they really require and to build a better customer satisfaction.

We are looking forward to working with every new customer based on mutual benefits, welcome to contact Voldatech today to find out how we can serve in the industry, to find out how our commitment to quality and excellence reaches all aspects of our business, from sales, to production and customer service, you'll see the difference with Voldatech.
