

About INFLUXIVE

IT Technology Solutions

“INFLUXIVE is an expertise focused IT services provider”

INFLUXIVE
TECHNOLOGIES

Mission

“To deliver and excel in **technology lead solutions and services** to **customers** in developed economies and to provide end-to-end Technology solutions and innovation in the emerging and developing economies”

“To focus on **developing and building technical expertise** by engaging proven innovative and exceptional minds, nurturing them by providing an **open platform** and channeling their technology and business innovation capabilities to **add value to the business of our customers.**”

INFLUXIVE
TECHNOLOGIES

Vision

“To establish **thought leadership in technology solutions and services**”

“We will be front-runners in **technology services and niche technology areas**”

INFLUXIVE
TECHNOLOGIES

Services : Custom Applications Development

- Do you want to have a custom process to leave competitors far behind?
- Are your Internal processes optimized over a long period of time?
- Do you think packaged solution would mean unnecessary high cost of acquisition, customization, and implementation?
- Do you want to bridge the gap in integrated IT system with development of missing systems?

INFLUXIVE

- Build the right system –Focus, Functional Consultants, Trained Engineers, Mature Development Processes
- Build the system right – Web Engineering Capability, Rational Unified Process, development focused organization
- Reduce the cost through offshore or near-shore development in Sweden or India
- Harness multiple technology expertise, Improving speed and efficiency without sacrificing quality and performance
- Build for integration

**INFLUXIVE
TECHNOLOGIES**

Services : Web Development

- Are you losing large number of customers with enterprise level needs?
- Is your budget allocation on new Webs, Web maintenance & support skewed?
- Is your development team able to transform the market needs into Webs as required?
- Are you concerned about large development team for short duration projects?

INFLUXIVE

- ISV level technology and Web development expertise
- Live industry Standards with RUP and IEEE Project Management tools - complete market focused development process
- Iterative development process - phase wise development and fully functional Web at the end of each phase – reduce time to market
- Various pricing models – allocate budget and pace for each market release
- Cost saving of more than 40%, i.e. 40% faster to break even

INFLUXIVE
TECHNOLOGIES

Services : Maintenance & Support

- Is your support 24 by 7 ?
- Does your current support partner understands domain?
- Are you able to focus on installed customer base?

INFLUXIVE

- 24x7 technical and functional support
- Customer technical problem report solution within stipulated timeframe
- Customer specific customization and configuration
- Implementation support at customer's end
- Supervised by Functional Consultants who have full understanding of business environment and your systems
- Advanced support applications for customer-wise history and context of problems
- Service Level Agreements for response time for both functional and technical support

Services : Re - engineering

- Are you in the trap of older technologies for whose maintenance, technical staff is costly and mostly difficult to find?
- Are enhancement requests coming regularly and adding to the Web instability?
- Do you face performance bottlenecks issues, database/OS porting & compatibility issues, or architectural changes?
- Do you have less internal resources to focus on important but not urgent re-engineering issues to have a stable and future savvy Web?

INFLUXIVE

- Industry focus, with trained technical team/experts having industry wide experience
- Mature processes and disciplined Web re-engineering tested globally with clients in US , Europe and Asia
- Functional Experts and CMM Level 3 processes helps streamlining and Increase ROI on existing Web development
- focus on RUP and Pattern oriented architecture empowers us to keep our architecture and design practices robust and advanced
- Outsourcing and Co-sourcing models with customer having complete control over requirements

**INFLUXIVE
TECHNOLOGIES**

Services : Pilot Solution Development

- Can you risk the time and money for testing your new ideas?
- Is your strategy for pilot development getting budgets?
- Are you looking for a pilot development partner who understands domain and technology both?

INFLUXIVE

- Provides technology implementation pilots and Web concept pilots
- You can focus on existing business till the time the new concept is not risk free
- Test pilots at a much lower cost
- Functional Consultants, Special Time Commitments, Minimum slippage Service Level Agreements
- Own Pilot Initiatives in Emerging technologies like Biometrics CRM and RFID

Technology and Methodology Experience

Requirements	Use Case Methodology, Feature Mapping and Prioritization, Requisite Pro, Online Discussion Threads, Mock GUIs through professional Designers
Architecture & Design	Architectural Patterns, Soft Real Time Systems, OSI based Layered Architecture, Rational Rose, UML, Enterprise Architect, GRASP Patterns, GoF Patterns, Hardware Communication, Asynchronous Communication, Highly Configurable systems, Highly Multi Threaded Systems
Implementation	PHP, Mysql, .NET, C, C++, Unix
Testing and Tuning	JUnit, Custom Test Framework, Rational Test Manager, Optimize IT, CPU Tuning, Memory Tuning,
Documentation	Help Authoring, JHelp, WinHelp
Rollout	Rollout Readiness Evaluations, User Documentation and Training, System Remote Monitoring
Integration	XML Integration, Flat File based Integration, Middleware Integration, API Based
Knowledge Management	Buffering, Shadowing, Weekly Classroom sessions, Expertise Tracks, Wiki based Knowledge sharing
Release/Project Management	MS Project, Metrics based on CMM, Weekly Management Reviews

Relationship Models

- Time and Material
- Fixed Price Model
- Time and Material with Fixed Price
- Risk and Reward Model
- Risk Sharing Model
- Co-Web Development
- Co-Pilot Development
