

COMPANY PROFILE

- TARGET INNOVATIONS, has evolved to be one of the leading Manufactures and Exporters of Metal Detectors from Goa, INDIA (IN). Over the years company has developed core strength in manufacturing and developing a comprehensive range of Metal Detectors that deliver Quality, Reliability & Performance. These products are continuously updated to meet the requirements of our customers and to the latest industry standards. We are a customer-focused organization dedicated to providing professional technical support before, during and after the sales. Our Metal Detectors are widely used by HACCP ,ISO , USDA, cGMP, USFDA CERTIFIED Organizations

For further information's Call us at.: + 91 98221 64324

Send E-mail to.: arun@targetinnovations.com

: arunarondekar1@gmail.com

Service's : Manufacturing , Exporting , Research and Development.

Our Range of Products: Gravity Feed Metal Detector, Tablet Metal Detector, Pulse Induction Metal Detector, Hand Held Metal Detector, Door Frame Metal Detectors.

METAL DETECTOR FOR BISCUIT

- Target Innovations are the leading manufacturers and exporters of Metal Detector systems from INDIA (IND).

Our Micro Scan Metal Detector can be fitted on Conveyors, Chutes, Pipelines as well as Packaging and Processing Equipment or other Bulk handling Equipments to provide complete unattended inspections.

Our Metal Detectors are able to detect both Ferrous & Non-Ferrous Metals passing anywhere through the Aperture.

APPLICATION:

- 1) For Biscuits / Confectionary / Bread Projects / Industry.
- 2) For checking plastic pouches /Dry and liquid Syrup in bottles.
- 3) For checking powders and granules and many more.

TABLET METAL DETECTOR (DIGITECH – 75)

We are the manufacturers and exporters of metal detector for pharmaceutical industry for inspection of tablets and capsules from INDIA..

Tablet metal detector are used for on line inspection of tablet and capsules and separate metal contaminated product.

Product feature :

Automatic balance principle.

Manual set up of sensitivity and all other parameters through potentiometers.

Easy to install and operate.

LED bar provided to display status of coils.

Easy changeable electronic module.

Stable performance throughout the life.

Product specification/models

We are having two models:

Uptmd-75 (analog) & digitech-75 (digital).

Both having aperture opening of

75mm width x 25mm height.

METAL DETECTOR - FREE FLOWING FOR POWDER / GRANULES/SPICES/RICE

We are the leading manufacturers and exporters of Metal Detectors worldwide.

Above series of metal separators is most effective at removing metal Particles from bulk Drugs, Pharmaceuticals, Granules, Spices and all other free flowing materials via a reject outlet. this range has been specially designed to meet the hygiene standard of food and Pharmaceuticals Industry. the Aperture tunnel of these Metal Detector are built with circular opening and are generally used with bagging machinery, multi-head weighers and form, fill and seal machines: where metal detection raises an alarm signals. They have been designed for the efficient and reliable rejection of metal contaminants, without interruption to the flow of material, even at high throughput speeds.

We are CE Certified organization from Zuarinagar, Goa, INDIA.

FOR MORE DETAILS CALL US AT : +91 98221 64324.

METAL DETECTOR FOR CONFECTIONERY

Target Innovations, Goa , India design and manufacture highly sensitive metal detectors for Confectionery and food industry.

Target Innovations has developed detectors specially for on –line confectionery (Candy) line. It is probably one of the most sensitive and stable metal detecting devices of its kind presently available. Metal detector provide an effective means of detecting all types of metals. Ideal for productions with frequently changing products.

Applications:

01. Pharmaceuticals.
02. Food processing.
03. Bottling units.
04. Sea foods/meat exports.
05. Packaging industry.
06. Rubber/plastic processing.

METAL DETECTOR,INDIA(ASIA)

Metal detectors are been used in Food Industries to detect metal contamination in packets or products. This system is installed on a conveyor belt system with an ONLINE rejection unit. When any metal contamination is passed through the metal detector unit, the same is detected and annunciated by the system. On detection of metal contamination,

a) the product can be rejected by an automatic reject mechanism which shall be operated by pneumatically

B) the conveyor motor can be interlocked so that so that the belt will stop automatically on detection. The metal detector and the conveyor mechanism are fully fabricated in Stainless Steel material with smooth dull finish which are widely accepted by all food industries. Note that this metal detector is a must for HACCP / US FDA certification.

METAL DETECTORS FOR DRYFRUIT INDUSTRY

TARGET INNOVATIONS, are the leading manufacturers and exporters of Metal Detectors from GOA, INDIA.

Our Stand Alone Metal Detectors can be used for Dry Fruits like Cashew /Pistachio ,Etc.

Our Metal Detectors can detect Ferrous / Non Ferrous and Stainless Steel Metal from food Products.

US FDA AND HACCP Certified companies are using our metal detectors.

METAL DETECTOR FROM INDIA

TARGET INNOVATIONS are the manufacturers and exporters of Metal Detectors for all applications like Food, Spices, Pharmaceuticals, Confectionery, Baking, Sea Foods ,Cement, Coal Handling Plant & Agro Based Industry.

We offer an extensive range of metal detection and separation solution for every type of conveying system used in industries. If the product is being conveyed on belts micro scan metal detector series with separators are able to remove metal from the products flow. The unit is constructed from stainless steel to meet the strict, modern hygienic standards of the food industry.

Application:

01. Food industry (biscuit/confectionary/frozen foods/etc.)
02. Pharmaceuticals (dry and liquid syrup filled in bottles)
03. Spices/pickle ind. (spices packed in pouches/bottles)
