Silica gel for breather transformers is generally used when moisture needs to be expelled from the change in volume that occurs when the cooling medium used for different applications, especially, in the electrical equipment industries.

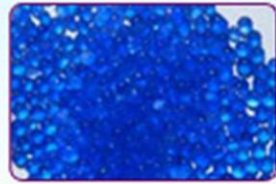

Silica Gel Crystal Suppliers and Silica Gel for breather transformers

Silica gel crystals have a huge appetite for the absorption of moisture and other toxic gases that can interfere in required the processes of breather transformers. It is no surprise that the number of manufacturers and suppliers have multiplied several times over the years in India. Some of the more reputed companies and their product specifications are listed below:

- **Archan Associates:** They claim to be high quality manufacturers of [Silica Gel for Breather Transformers](#), and also procure their raw materials that are required in its manufacture are sourced from the most reliable vendors in the market to ensure the best quality of silica gel breathers. Besides, they employ very strict quality control measures that make sure that the purity and

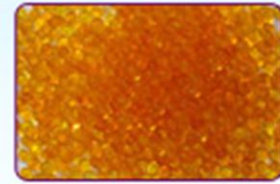

effectiveness of the finished product is not compromised with. They stress on the fact that they will last longer than most other similar products and guarantee the highest levels of reliability.

Blue Silica Gel Beads

White Silica Gel Crystals

Orange Silica Gel Beads

- **Sorbead India:** This Company is one of the most established and recognized in the manufacture and supply of high grade [Silica Gel Crystal Suppliers](#), and especially, silica gel for breather transformers. They manufacture almost all kinds of variations that can be possible in the manufacture of high class silica gel crystals. Naturally, their use in the breather transformer section also provides the best end results.

➤ The [Silica Gel](#) Crystals manufactured and supplied by them can be of the plain white transparent non indicating variety or the blue and orange colored crystals that give suitable information on the amount of saturation. Each one of them is available in the choice of mesh and micron size that a client demands. The Blue silica gel crystals are the first choice when it comes to its application in the breather transformers. These are useful for refrigeration and air conditioning purposes, for hearing aids and gas drying properties among several other applications.

➤ **MB Suppliers** in Kolkata, West Bengal are specialists in the manufacture and supply of silica gel for breather transformers. This product is manufactured using the highest quality standards and strictly on the client's specifications. It is also well known for its excellent finish and high quality.
